Statement

I work within a range of artistic practices, from large-scale public art and mural work, to painting, printmaking, and hand-drawn and digital illustration.

Incorporating the aesthetics of bright and considered colour placement and line work, I enjoy creating, bold and subtly detailed, playful emotive artworks. In visualising, re-imagining, and merging collective experiences, my work intends to provide room for contemplation and self reflection of one's relationship to their surroundings. I create work that evokes feeling, offers comfort, and serves as sites of power.

Selected Exhibitions
